2 Hazard(s) identification	
• <i>Classification of the substance or mixture</i> Flam. Lig. 4 H227 Combustible liquid.	
Eye Dam. 2B_H320_Causes eye irritation.	
 Label elements GHS label elements The product is classified and labeled according to the Globally Harmonized System (GHS). Hazard pictograms Not classified Signal word Warning 	
· Hazard statements H227 Combustible liquid.	
H320 Causes eye irritation. • Precautionary statements Keep away from flames and hot surfaces. – No smoking.	
Avoid breathing dust/fume/gas/mist/vapors/spray Wash thoroughly after handling. Use only outdoors or in a well-ventilated area.	
Wear protective gloves/protective clothing/eye protection/face protection.	
IF INHALED: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a POISON CENTER/doctor if you feel unwell. If skin irritation occurs: Get medical advice/attention.	
If eye irritation persists: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. In case of fire: Use for extinction: CO2, powder or water spray.	
Store in a well-ventilated place. Keep cool. Dispose of contents/container in accordance with local/regional/national/international regulations.

4 First-aid measures

Description of first aid measures

General information: Keep warm, position comfortably and cover well.

- After inhalation: Remove victim from exposure to fresh air. Keep person at rest. Provide oxygen if person is not breathing. Supply fresh air; consult doctor in case of complaints.
- After skin contact:

Do not pull bonded skin apart. Soak in warm soapy water. Gently peel apart using a blunt instrument. If skin is burned due to the rapid generation of heat by a large drop, seek medical attention. If lips are bonded, apply warm water to the lips and encourage wetting and pressure from saliva in mouth. Peel or roll lips apart. Do not pull lips apart with direct opposing force. If skin is occurs, get medical advice/attention.

After eye contact: Immediately flush with plenty of water for at least 15 minutes. Get medical attention. If eyelids are bonded closed, release eyelashes with warm water by covering with a wet pad. Do not force eye open. Cyanoacrylate will bond to eye protein and will cause a lachrymatory effect which will help to debond the adhesive. Keep eye covered until debonding is complete, usually within 1-3 days. Medical attention should be sought in case solid particles of polymerized cyanoacrylate trapped behind the eyelid caused abrasive damage. After swallowing:

Ensure breathing passages are not obstructed. The product will polymerize rapidly and bond to the mouth making it almost impossible to swallow. Saliva will separate any solidified product in several hours. Prevent the patient from swallowing any separated mass. Information for doctor:

- Most important symptoms and effects, both acute and delayed No further relevant information available. Indication of any immediate medical attention and special treatment needed Check section 11 Toxicological Information for further relevant information.

5 Fire-fighting measures

- Extinguishing media Suitable extinguishing agents: Use fire fighting measures that suit the environment. Alcohol resistant foam

 - Fire-extinguishing powder Carbon dioxide

For safety reasons unsuitable extinguishing agents: No relevant information. Special hazards arising from the substance or mixture Caution! Combustible liquid.

In case of fire, the following can be released: Nitrogen oxides (NOx) Carbon dioxide (CO₂) and Carbon monoxide (CO) Advice for firefighters

Protective equipment: If employees are expected to fight fires, they must be trained and equipped as stated in the OSHA fire brigades standard (29 CFR 1910.156). As with any fire, wear positive-pressure self-contained breathing apparatus and full protective gear that are NIOSH approved.

6 Accidental release measures

Personal precautions, protective equipment and emergency procedures Caution! Combustible liquid; wear fire/flame resistant or retardant clothing during cleaning up. Wear protective clothing. Do not breathe gas, vapors, dusts or mists if their inhalable particles occur during use. Environmental precautions: Do not allow product to reach sewage system or any water course. Methods and material for containment and cleaning up: Ensure adequate ventilation. Flood area to polymerize material then soak up with an inert absorbant. Non sparking tools should be used. Dispose contaminated material as waste according to item 13. 7 Handling and storage Handling: Precautions for safe handling Open and handle receptacle with care.

Open and nandle receptacle with Care. Keep away from incompatible material(s). Avoid any release into the environment. For industrial or professional use only Do not breathe dust/fumes/mist/vapor/spray. Avoid contact with eyes, skin and clothing. Keep away from heat,sparks, flames and ignition sources. Observe all the personal protection requirements in Section 8.

Conditions for safe storage, including any incompatibilities

Storage: Requirements to be met by storerooms and receptacles:

- Store only in the original receptacle. Provide ventilation for receptacles.
- Keep stored in accordance with local, regional, national, and international regulations.

10 Stability and reactivity

· Reactivity Combustible liquid.

- Hazardous Reactivity and Chemical Stability Stable under normal conditions of use, storage and temperatures. Thermal decomposition / conditions to be avoided: To avoid thermal decomposition do not overheat. No decomposition if used and stored according to specifications.
 Possibility of hazardous reactions In contact with incompatible materials.
 Conditions to avoid Keep away from heat, sparks, flame and any other ignition sources.

- Incompatible materials: Oxidizing agents Strong reducing agents Bases (Alkalis) Amines
- Water
- alkali metals

Hazardous decomposition products: Possible in traces.

11 Toxicological information

Information on toxicological effects

- Acute toxicity: LD/LC50 values that are relevant for classification: See acute inhalative effect(s) for further information

 - Specific symptoms in biological assay: No further relevant information available; classification is not possible. See acute inhalative effect(s) for further information.
 - Primary irritant effect:
- on the skin: No irritant effect.
 on the eye: Irritating effect.
 Sensitization: No sensitizing effects known.
 Additional toxicological information:

The product shows the following dangers according to internally approved calculation methods for preparations: Irritant

- · Carcinogenic categories
- OSHA-Ca (Occupational Safety & Health Administration)

None of the ingredients is listed.

12 Ecological information

- Toxicitv
- Aquatic toxicity: No further relevant information available.
 Persistence and degradability No further relevant information available.
 Behavior in environmental systems:
 Bioaccumulative potential No data available.
 Mobility in soil No further relevant information available.
 Additional coelected information: The product is non-readid degradable.
- Additional ecological information: The product is non-rapid degradable, and low or not highly bioaccumulative.
 General notes: Danger to drinking water if even small quantities leak into the ground.
 Results of PBT and vPvB assessment
- PBT: None of the ingredients is listed. vPvB: None of the ingredients is listed. Other adverse effects No further relevant information available.

13 Disposal considerations

- Waste treatment methods
 Recommendation: Must be specially treated adhering to official regulations.
- Uncleaned packagings: Recommendation: Dispose of according to your local waste regulations.
