**General information:** Keep warm, position comfortably and cover well.

#### After inhalation:

Remove victim from exposure to fresh air. Keep person at rest. Provide oxygen if person is not breathing.

Supply fresh air and if symptoms occur call for a doctor.

In case of unconsciousness place patient stably in side position for transportation.

#### After skin contact:

Immediately wash with water and soap and rinse thoroughly.

Remove all contaminated clothing and wash before reuse.

If skin rash or irritation occurs, seek medical advice.

#### After eye contact:

Immediately flush opened eyes with water for 5 minutes, then remove contact lenses if present, continue flushing for at least another 15 minutes.

If symptoms develop seek medical attention.

#### After swallowing:

If victim is unconscious; never give anything by mouth.

If victim is conscious, rinse out mouth with water.

Get medical attention if you feel unwell.

#### Information for doctor:

**Most important symptoms and effects, both acute and delayed** No further relevant information available.

Carbon dioxide

dry chemical

Water spray

### Special hazards arising from the substance or mixture

Will not burn unless preheated.

In case of fire, the following can be released:

Aldehydes

Phenolics

Carbon dioxide (CO<sub>2</sub>) and Carbon monoxide (CO)

### Advice for firefighters

#### Protective equipment:

If employees are expected to fight fires, they must be trained and equipped as stated in the OSHA fire brigades standard (29 CFR 1910.156).

As with any fire, wear positive-pressure self-contained breathing apparatus and full protective gear that are NIOSH approved.

## 6 Accidental release measures

### Personal precautions, protective equipment and emergency procedures

Wear protective clothing.

Do not breathe gas, vapors, dusts or mists if their inhalable particles occur during use.

### Environmental precautions:

Inform respective authorities in case of seepage into water course or sewage system.

Do not allow to enter sewers/ surface or ground water.

### Methods and material for containment and cleaning up:

For large spills: provide diking or containment to minimize spreading. If possible pump and store material in appropriate container.

For small spills: Ventilate and wash area. Collect spills and absorbant material in appropriate container.

Ensure adequate ventilation.

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
