| Hazard statements (GHS US) | H227 - Combustible liquid H315 - Causes skin irritation. H319 - Causes serious eye irritation. H335 - May cause respiratory irritation. |
| Precautionary statements (GHS US) : | P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P261 - Avoid breathing dust/fume/gas/mist/vapours/spray. P264 - Wash hands, forearms and face thoroughly after handling. P271 - Use only outdoors or in a well-ventilated area. P280 - Wear protective gloves/protective clothing/eye protection/face protection. P302+P352 - If on skin: Wash with plenty of water. P304+P340 - If inhaled: Remove person to fresh air and keep comfortable for breathing. P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P312 - Call a poison center or doctor if you feel unwell. P332+P313 - If skin irritation occurs: Get medical advice/attention. P362+P364 - Take off contaminated clothing and wash it before reuse. P370+P378 - In case of fire: Use media other than water to extinguish. P403+P235 - Store in a well-ventilated place. Keep cool. P405 - Store locked up. P501 - Dispose of contents/container to hazardous or special waste collection point, in accordance with local, regional, national and/or international regulation. |

| SECTION 4: First-aid measures | |
|---|--|
| 4.1. Description of first aid measures | |
| First-aid measures general | : Call a poison center or a doctor if you feel unwell. |
| First-aid measures after inhalation | : Remove person to fresh air and keep comfortable for breathing. If experiencing respiratory symptoms, call a doctor. |
| First-aid measures after skin contact | Do not pull bonded skin apart. Use a blunt object such as a spoon to gently release the bonded skin. Soaking in warm soapy water will aid with the debonding. Gently wash with plenty of soap and water. Cyanoacrylates give off heat on solidification. In rare cases a large drop will generate enough heat to cause a burn. Burns should be treated normally after the adhesive has been removed from the skin. If lips are accidentally stuck together apply warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips apart with direct opposing action. If skin irritation occurs: Get medical advice/attention. |
| First-aid measures after eye contact | : Immediately flush with plenty of water for at least 15 minutes. Get medical attention. If eyelids are bonded closed, release eyelashes with warm water by covering with a wet pad. Do not force eye open. Cyanoacrylate will bond to eye protein and will cause a lachrymatory effect which will help to debond the adhesive. Keep eye covered until debonding is complete, usually within 1-3 days. Medical attention should be sought in case solid particles of polymerized cyanoacrylate trapped behind the eyelid caused abrasive damage. |
| First-aid measures after ingestion | : Adhesive becomes solid in contact with saliva and may adhere to inside of mouth. Saliva will lift adhesive in 1-2 days. Avoid swallowing solid adhesive after detachment. |
| 4.2. Most important symptoms and effect | ts (acute and delayed) |
| Potential adverse human health effects and symptoms | : Gross contamination with the adhesive may generate enough heat to cause a burn. |
| Symptoms/effects after inhalation : May cause respiratory irritation. | |
| Symptoms/effects after skin contact | : Irritation. |
| Symptoms/effects after eye contact | : Eye irritation. |
| 4.3. Immediate medical attention and sp | ecial treatment if necessary |

4.3. Immediate medical attention and special treatment, if necessary

Treat symptomatically.

| SECT | ON 5: Fire-fighting measures | |
|---------|--|--|
| 5.1. | Suitable (and unsuitable) extinguishin | ng media |
| Suitab | le extinguishing media | : Water spray. Dry powder. Foam. Carbon dioxide. |
| Unsuit | able extinguishing media | : Do not use a heavy water stream. |
| 5.2. | Specific hazards arising from the che | mical |
| Fire ha | azard | : Combustible liquid. |
| Reacti | vity in case of fire | : Hazardous decomposition products in case of fire. Nitrogen oxides. Carbon oxides (CO, CO2). |
| 5.3. | Special protective equipment and pre | cautions for fire-fighters |
| Protec | tion during firefighting | : Do not attempt to take action without suitable protective equipment. Self-contained breathing apparatus. Complete protective clothing. |

| SECTION 6: Accidental release n | neasures | | |
|--|--|--|--|
| 6.1. Personal precautions, protective | 5.1. Personal precautions, protective equipment and emergency procedures | | |
| 6.1.1. For non-emergency personnel Emergency procedures | : Ventilate spillage area. No open flames, no sparks, and no smoking. Avoid breathing dust/fume/gas/mist/vapours/spray. Avoid contact with skin and eyes. | | |
| 6.1.2. For emergency responders Protective equipment | : Do not attempt to take action without suitable protective equipment. For further information refer to section 8: "Exposure controls/personal protection". | | |
| 6.2. Environmental precautions | | | |
| Avoid release to the environment. | | | |
| 6.3. Methods and material for conta | inment and cleaning up | | |
| For containment : Do not use cotton, wool or carbon fiber type materials for absorbants. These types of materials react exothermically with the cyanoacrylate. | | | |
| Methods for cleaning up | : Take up liquid spill into absorbent material. Notify authorities if product enters sewers or public waters. Flood area with water to polymerize and then scrape off of the floor. | | |
| Other information | : Dispose of materials or solid residues at an authorized site. Non hazardous waste. | | |
| 6.4. Reference to other sections | | | |
| For further information refer to section 13. | | | |
| SECTION 7: Handling and storage | je | | |
| 7.1. Precautions for safe handling | | | |
| Additional hazards when processed | Applying cyanoacrylate to some natural materials such as cotton (jeans, cotton swabs, cotton balls, and certain yarns or fabrics), or leather or wool results in a powerful, rapid, exothermic reaction. This reaction also occurs with fiberglass and carbon fiber. | | |
| Precautions for safe handling : Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Wear personal protective equipment. Use only outdoors or in a well-ventilated a Avoid breathing dust/fume/gas/mist/vapours/spray. Avoid contact with skin and eyes. | | | |
| Hygiene measures : Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Always wash hands after handling the product. | | | |
| 7.2. Conditions for safe storage, including any incompatibilities | | | |
| Change and differen | . Changing your tighted place. Keen and Chang leaked your Keen containen tightly claced De | | |

| .1. Disposal methods | |
|--|---|
| | |
| Vaste treatment methods | Dispose of contents/container in accordance with licensed collector's sorting instructions. Cured adhesive: Dispose of as water insoluble non-toxic solid chemical in authorised landfill or incinerate under controlled conditions. Dispose of in accordance with local and national regulations. Polymerise by adding slowly to water (10:1).After use, tubes, cartons and bottles containing residual product should be disposed of as chemically contaminated waste in an authorised legal land fill site or incinerated Disposal must be made according to official regulations. |
